Van Isle Barge Services Ltd.  
is not a common carrier. All  
traffic is subject to commercial  
arrangements being made  
prior to any shipments.

## Our Fleet

Van Isle Barge Services operates a fleet of articulating tugs and barges (ATB), which are designed for the ocean carriage of roll-on and roll-off (RORO) traffic, including semi-trailers, automobiles, off road industrial equipment and other self-propelled vehicles.

Each day the ATB vessels berth at our terminals' custom built, environmentally safe, hydraulic ramp systems.

### Expanding with Sea-Link Marine Services Ltd.,

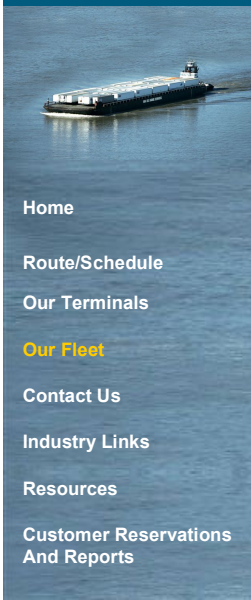

VIBS owns the three purpose-built ATB's that are both self-powered and "pushed" by third party tugboats. Two barges are currently in service while the third barge is nearing completion of its conversion from a tow ocean-going barge to a coastal pusher barge.

#### Arctic Hooper / Fraser Link

	Type	ATB (deck cargo vessel formerly an ocean going barge)
	Overall length & width	494' x 76'
	Trailer capacity	44 (53' equiv.)
