Van Isle Barge Services Ltd. is not a common carrier. All traffic is subject to commercial arrangements being made prior to any shipments.

Van Isle Barge Services operates a fleet of Articulating Tugs and Barges (ATB), which are designed for the ocean carriage of roll-on and roll-off (RORO) traffic, including semi-trailers, automobiles, off road industrial equipment and other self-propelled vehicles.

Each day the ATB vessels berth at our terminals' custom built, environmentally safe, hydraulic ramp systems.

Together with Sea-Link Marine Services Ltd., we are building a reliable fleet.

Arctic Hooper / Fraser Link		
	Type	ATB (deck cargo vessel formerly an ocean going barge)
	Overall length & width	494' x 76'
	Trailer capacity	44 (53' equiv.)
